PRODUCT DESCRIPTION

The Able Life Universal Stand Assist is ideal for those who need additional leverage when rising from a seated position. It features two ergonomic support handles that provide firm grip and stability for

controlled sit-to-stand movements.

The frame's height and width can be adjusted and fits most couches and cushioned armchairs.

Its low-profile, powder-coated steel design blends easily with home furniture while offering durable, long-term support.

Please note: this product is not suitable for use with lift chairs.

Who it's for

- For clients needing reliable support to rise safely from couches or armchairs.
- For therapists supporting clients with reduced lower limb strength who require stable, ergonomic assistance during transfers.

Key features

- **Dual support handles** – assist with safe, controlled sit-to-stand transitions
 - **Adjustable frame** – fits a wide range of couches and armchairs
 - **Low-profile design** – integrates easily into home environments
 - **Powder-coated steel frame** – ensures lasting strength and durability
- **Easy assembly** – fits together easily and adjusts to user and furniture needs
- **Designed for use on standard furniture** – provides convenient standing support in home settings
