ADJUSTA WEDGE BODY SUPPORT

\$369.99

The Adjusta Wedge can be set at any angle you need for elevated sleeping, a comfortably propped angle for reading, or almost upright for eating or doing activities in bed, and it doesn't move around like a stack of slippery pillows!

PRODUCT DESCRIPTION

This wedge allows variable backrest positioning similar to that achieved with an electric adjustable bed. It is particularly useful if you are used to an adjustable bed but are needing to stay somewhere that doesn't have one!

The benefit of the two-piece construction enables variation of the angle to any position between 15 degrees and 75 degrees and makes it readily portable to be used on the move.

The adjustability options will allow you to rest, read, sleep and relax while your body is completely supported and comfortable.

Can be used with or without a pillow depending on the comfort needs and requirements of the user.

Benefits:

- Alleviates back pain due to load bearing on the lower back while sleeping, convalescing or in hospital.
- Relieves respiratory discomfort and eases breathing problems due to emphysema, asthma, chest congestion, bronchial, GERD and reflux.
- Assists with snoring and mild sleep apnoea.
- Reduces coughing and drains mucus from the throat to ease symptoms of colds, congestion and post nasal drainage.

Materials:

- Inner: High Density Open Cell Eureka Foam
- Outer: 100% Cotton quilted cover
- Outer Slip: Tailored Fitted Easy Wash Cotton Cover
- 100% Australian Made

Please note: the Theramed Knee Relaxer is an add-on product and shown for illustration purposes in the third image – it can be purchased separately as an add on for the Adjusta Wedge.
