PRODUCT DESCRIPTION

The Bellavita Bath Lift is a reliable, lightweight solution that allows individuals to bathe safely and independently. With easy-touch controls, it lowers the seat to just 6 cm, enhancing immersion and comfort. After bathing, it gently lifts the person back up for a safer transfer.

This ergonomic lift reclines to 50°, supporting those who need a wider hip-to-back angle or have restricted flexibility. At a raised height of 48 cm, it aligns with standard wheelchair or commode heights, allowing for level transfers.

The unit splits into two lightweight parts for convenient handling and transport.

A waterproof, floatable hand control features large buttons and built-in safety indicators. The lift will not lower unless there is enough charge to raise it again, while an emergency stop button provides added reassurance.

Four quick-release suction feet secure the lift in the bath, and washable covers support hygiene and easy maintenance.

Who it's for

- For clients with limited lower limb strength, balance challenges or restricted hip movement which impacts safer transfers in and out of the bath.
- For therapists prescribing assistive technology to enhance safe, independent bathing at home or in community care settings.

Key features

- **Push-button lift and lower function** – supports independent, strain-free transfers
- **50° backrest recline** – ideal for those needing a wider hip-to-back angle
- **Ultra-low 6 cm seat height** – promotes full immersion, even in shallow baths
- **Raised seat height of 48 cm** – aligns with wheelchairs or commodes for level transfers
- **Two-part, lightweight design** – easy to transport, install and store
- **Four quick-release suction feet** – ensure secure placement and easy removal
- **Floatable, waterproof hand control** – straightforward operation in or out of the water
- **Lithium battery with charge indicator** – prevents lowering if insufficient power to raise
- **Emergency stop button** – adds safety and peace of mind
- **Durable, recyclable plastic construction** – With a safe working load up to 140 kg
