## PRODUCT DESCRIPTION

Crafted from aluminium, this cane provides a sturdy yet lightweight support option, making it easy to handle and manoeuvre during daily activities. The straight PVC handle is designed to fit comfortably in the user's hand, reducing strain and enhancing grip during use. Its universal orientation accommodates both left and right-handed users.

Featuring a height adjustment range, the cane can be customised to suit individual user needs, promoting optimal posture and comfort.

### Who it's for

- For clients with reduced balance, strength or endurance when walking.
- For therapists prescribing walking aids for greater independence.

### Key Features
