## PRODUCT DESCRIPTION

The Days Swift Self-Propelled Wheelchair is a practical solution for short-term mobility support. Its ultra-light aluminium frame makes lifting and handling straightforward, especially during travel or storage.

This model includes a half-folding backrest and quick-release rear wheels for compact storage. The swing-away, removable leg rests allow for easier transfers, while the solid, puncture-proof tyres provide low-maintenance and reliability on a range of surfaces.

Attendant-controlled drum brakes offer improved control and security, especially when navigating slopes or uneven ground.

With its narrow frame and multiple seat width options, the Days Swift is suitable for tight indoor spaces and general mobility use.

### Who it's for

- For clients seeking a lightweight, compact wheelchair for short-term or occasional use.
- For therapists requiring an entry-level mobility aid that's easy to handle, store and maintain.

### Key features

- **Ultra-light aluminium frame** - makes lifting and transport simple
