	S10584	\$999.99		King Single
	S305285	\$1,799.99		Long Double
	S10583	\$1,899.99		Queen

PRODUCT DESCRIPTION

Pressure Redistribution

ActiveX™ Material is always adapting to allow blood to circulate freely and to minimise pressure on areas of risk. It responds to pressure and temperature.

No Springs

Icare mattresses don't have any springs which makes them suitable for any profiling or static mattress platforms. We have found springs cause problems over time particularly on medical beds. And of course springs don't have a good pressure care track record.

Key features

- 22.5 cm Mattress Depth
- SWL Minimum 30 kg
- SWL Maximum 200 kg
- For use with any I-Care Bed
- The mattresses are also available in two more variations: medium support [IC20](#) and supportive firm [IC15](#)
