INOGEN G5 / ROVE 6 BACK PACK

\$269.99

The Inogen One G5 / Rove 6 Backpack is an ideal accessory for the active oxygen user. This ultra-light and stylish backpack features a thermoformed shell that provides stability and protection for the concentrator. Constructed of water-resistant polyester, it includes an EVA-protected compartment that securely holds the unit while safeguarding it from accidental bumps. Additionally, there is a plastic protective display shield that provides easy access to the LCD screen, along with mesh venting to ensure the unit stays cool during operation.

The backpack offers ample storage compartments, including a large inside pocket for personal items such as jackets, purses, or snacks, a spacious lower pocket perfect for additional batteries or power cords, an easy-to-reach lined pocket ideal for a wallet or cell phone, and side pockets for extra cannulas or water bottles.

With padded, adjustable shoulder straps and low and high straps designed to fit most oxygen users, this backpack is comfortable and easy to carry. A must-have for on-the-go oxygen travellers.
