PRODUCT DESCRIPTION

The Alivio Donatello Plus Lift Chair (Quint Motor) provides a full suite of features for those needing advanced support and positioning. With five independent motors, the chair enables individual control of the headrest, lumbar, backrest, legrest and tilt-in-space functions – ideal for managing comfort, posture and mobility.

Its zero-gravity tilt-in-space positioning reduces pressure and creates a sensation of weightlessness, helping promote circulation and comfort.

An integrated acupressure massage function in the backrest offers three adjustable settings, while the heated seat supports stress relief and muscle relaxation.

The chair also includes modern conveniences such as a premium airline-style headrest, a retractable drink holder on the left side, and a wireless phone charging panel with heat and massage controls on the right.

Upholstered in stylish, durable fabric, the Donatello Plus is designed for lasting use and home integration.

Who it's for

- For clients who need high-level adjustability with massage, heating and tilt-in-space functions.
- For therapists seeking a multi-functional lift chair with pressure relief and custom comfort options for their client.

Key features

- **Five independent motors** – supports infinite positioning with separate control of all sections
- **Zero-gravity tilt-in-space** – helps reduce pressure and improve circulation
- **Acupressure massage function** – with three pressure levels for targeted back relief
- **Heated seat section** – reduces stress and supports muscle relaxation
- **Airline-style headrest** – provides ergonomic neck and head support
- **Integrated USB handset** – with backlight for ease of use and device charging
- **Retractable drink holder** – built-in for convenience
- **Retractable wireless phone charger** – with built-in heat and massage control panel
- **Durable fabric upholstery** – stylish and made for long-term comfort
