PRODUCT DESCRIPTION

The Kennington Twin Seat Dual Motor lift chair provides great relaxation, a hint of elegance, and a simple motorized recline. This one-of-a-kind dual motor recliner includes cup holders, a handwand with a USB port, and console storage in addition to an independent head and leg rest function.

Single vs twin vs quad motor lift chairs - what's the difference?

All ILS lift chairs have a lifting action, to support the user to stand from a seated position.

- Single motor chairs move the back rest and leg rest at the same time.
- Twin motor chairs allow the backrest and leg rest to move independently of each other, typically allowing for a greater degree of leg elevation and greater degree of recline compared to a standard single motor chair.
- Quad motor chairs allow independent movement of headrest, lumbar, backrest and footrest allowing for the greatest level of re-positioning of all chairs.
