LONG HANDLED CURVED BATH BRUSH

\$69.99

The Long-Handled Curved Bath Brush supports safe, independent bathing by helping reach the back, legs and feet. Its ergonomic shape is ideal for people with limited arm, shoulder or spinal mobility.

PRODUCT DESCRIPTION

The Long-Handled Curved Bath Brush is designed to improve reach during personal care routines. The curved, twistable handle allows individuals to adjust the angle of the brush to suit their needs, reducing the need for stretching or twisting.

Soft bristles offer a gentle cleanse, while the non-slip handle provides stability even in wet conditions. Lightweight and easy to grip, the brush supports use in both seated and standing positions.

A built-in hanging hole allows for convenient drying and storage between uses. It's suitable for personal or clinical care environments to maintain bathing independence.

Who it's for

- For clients with upper body mobility limitations from arthritis, injury or post-surgical recovery.
- For therapists and carers supporting independent and safe bathing routines.

Key features

- **Curved long handle** – supports reach to back, feet and legs without overextension
- **Twistable ergonomic design** – allows small angle adjustments for improved control
- **Soft bristle head** – provides gentle, effective cleansing for daily hygiene

- **Non-slip grip** – stable and safe to use with wet hands
- **Hanging hole** – supports easy storage and drying

ADDITIONAL INFORMATION
