PRODUCT DESCRIPTION

Look no farther than Pride's infinite-position LC-107 power lift recliner for a versatile lift chair that will provide therapeutic support. This beautiful model is ideal for unwinding in front of the television and offers excellent value for money.

Single vs twin vs quad motor lift chairs - what's the difference?

All ILS lift chairs have a lifting action, to support the user to stand from a seated position.

- Single motor chairs move the back rest and leg rest at the same time.
- Twin motor chairs allow the backrest and leg rest to move independently of each other, typically allowing for a greater degree of leg elevation and greater degree of recline compared to a standard single motor chair.
- Quad motor chairs allow independent movement of headrest, lumbar, backrest and footrest allowing for the greatest level of re-positioning of all chairs.
