

SKU:

ROHO SECTION OVERLAY

\$1,499.99

The Roho Section Overlay offers modular pressure care with individually adjustable air sections. Suitable for clinical and home settings, it provides flexible, non-powered support for individuals at medium risk of pressure injury.

Please note, sections are sold individually (x4 sections are required for a complete system)

PRODUCT DESCRIPTION

The Roho Section Overlay uses interconnected air cells that promote immersion and distribute pressure across contact points. Each section works independently or as part of a full mattress overlay (sold as four sections).

The system is inflated manually using a hand pump and requires no electricity. Air cells are made from flame-resistant neoprene and are designed to conform to body contours while reducing shear and friction.

Lightweight and compact, it's easy to clean and transport between care environments.

Who it's for

- For clients at medium pressure injury risk needing adaptable support.
- For therapists requiring a section-based overlay that allows individual air adjustment and modular use.

Key features

- **Interconnected air cell design** - promotes immersion and reduces pressure
- **Modular setup** - use one or multiple sections
- **Manual inflation** - allows adjustable air pressure for individual comfort
- **Air cells** - conform to body contours for effective pressure redistribution. Each cell is specially treated to minimise friction and resulting shear
- **Non-powered design** - eliminates the need for electricity, reducing noise and heat
- **Flame-resistant neoprene material** - ensures durability and ease of cleaning
- **Drainage holes** - helps maintain a dry and comfortable surface
- **Portable and lightweight** - suitable for clinical and homecare settings

ADDITIONAL INFORMATION

Brand	Roho
Width	860 mm
Length (per section)	510 mm
Height	90 mm
Max SWL	Unlimited
Manufacturer's part number	1800
Section	One Section, Four Section
