SEAT BELT REACHER

\$45.44

The Seat Belt Reacher supports people with limited mobility by extending the seatbelt strap for easier access. It reduces strain when fastening the seatbelt and clips on easily without tools.

PRODUCT DESCRIPTION

The Seat Belt Reacher is a lightweight extension aid designed to assist those who find it difficult to reach their seatbelt. It clips securely onto the existing seatbelt strap, creating an extended handle that brings the belt closer to the hand.

This helps minimise shoulder or torso twisting, making vehicle entry and exit safer and more comfortable. Constructed from durable plastic, the reacher is easy to attach or remove without tools and is compatible with most standard seatbelt types.

Its compact design makes it suitable for use in different vehicles or passengers as needed.

Who it's for

- For clients with reduced shoulder mobility, arthritis or back conditions who find it challenging to reach their seatbelt.
- For therapists supporting clients in maintaining independence and safety during vehicle transfers.

Key features

- **Extends seatbelt handle** - brings the seatbelt within easier reach to reduce twisting
 - **Easy clip-on design** - attaches and detaches without tools for convenience
- **Lightweight and portable** - suitable for use in multiple vehicles or on different seatbelts
 - **Durable construction** - made from sturdy plastic for long-lasting use
 - **Universal fit** - compatible with most standard seatbelt designs

ADDITIONAL INFORMATION

Handle Length	14 cm
