PRODUCT DESCRIPTION

The Forte Standard Vinyl Hospital Mattress is a versatile, low-risk pressure care mattress designed for individuals requiring comfort and support in various care settings. Its durable construction and heavy-duty cover make it suitable for high demanding patient scenarios. This cover is designed as a damage resistant cover and does not offer pressure care.

The mattress features a supportive foam core which provides comfort and support for repositioning and basic patient care. The heavy-duty cover is manufactured with 100% waterproof, durable PVC material. The cover protects the inner foam, has superior resistance to cleaning agents, and provides a highly durable mattress solution for environments with demanding patient care.

Who it's for

- For clients at low pressure care risk in environments with high physical or hygiene demands.
- For therapists needing a resilient mattress solution for high-wear clinical or residential settings.

Key features

- **Ideal for low care applications** - suited where support and comfort is required and individuals are at low risk of pressure injury
- **High stability** - quality foam provides an effective support surface for patient positioning and transferring
- **Heavy-duty PVC cover** - designed to provide a robust, durable and protective solution to increase mattress longevity. Designed for high demanding patient care, is 100% waterproof, compliant to relevant standards and exceeds infection control requirements
- **Construction** - all seams high frequency sealed and welded
