PRODUCT DESCRIPTION

The Sterling S700 is the flagship outdoor model in the Sterling range. It's equipped with 13" pneumatic wheels, x2 75AH batteries and full 4-wheel suspension – with each wheel operating independently to maximise ride comfort across varied terrain.

The luxury seat includes seat depth, recline and swivel functionality, as well as adjustable headrest and armrests. Ergonomic controls include a wraparound delta tiller and wig-wag throttle, supporting intuitive handling even for those with reduced hand strength.

LED lighting technology enhances visibility while conserving battery power, and additional features include twin rear-view mirrors, seat belt and front basket – all finished in the brand's signature metallic silver style.

Who it's for

- For clients needing extended range and robust suspension for regular outdoor use.
- For therapists prescribing a long-range scooter with advanced terrain handling and comfort.

Key features
