PRODUCT DESCRIPTION

The Theorem Ludlow Lift Chair (Quad Motor) combines flexibility and support with added lower leg extension. Its quad motor system allows independent adjustment of the back, headrest, legrest and lumbar .

A key feature is the built-in footrest extension, ideal for those who need more leg support.

The chair is easily operated by a USB-equipped hand control, allowing seamless positioning and device charging.

Side pockets and plush cushioning round out a well-considered lift recliner for everyday use. Available in two colours.

Who it's for

- For clients needing a lift recliner with head-to-toe adjustability and extra legroom.
- For therapists wanting enhanced positioning options for clients with longer legs or circulation needs.

Key features

- **Quad motor design** – allows full customisation of position and support
- **Footrest extension** – offers better support for taller individuals
- **USB hand control** – for intuitive operation and charging convenience
- **Soft cushioning** – supports comfort in various seated or reclined positions
- **Side storage pockets** – keeps personal items within reach
