PRODUCT DESCRIPTION

The Drive Medical Viper Mobility Scooter is engineered to provide style, control and confidence for everyday mobility. Its front and rear suspension, combined with large 14" pneumatic tyres, ensures a comfortable and stable ride on varied terrain.

A padded captain's seat includes a reclining backrest, adjustable headrest and angle-adjustable flip-up armrests – all designed for comfort and ease of transfers. The ergonomic delta handlebars and one-touch tiller adjustment support controlled, relaxed steering.

This model also features a USB charging port for mobile devices, dual rear-view mirrors for added awareness, and full LED lighting with turn signals and parking lights for safety in low light.

It also features a front carry basket and anti-tip wheels.

A freewheel function allows the scooter to be moved without powering the motor, offering further flexibility.

Who it's for

- For clients seeking a larger scooter with suspension and ergonomic features for long-term use.
- For therapists recommending a high-capacity scooter that offers safety, comfort and intuitive control.

Key features
