

Far North Queensland Education Roadshow

ILS Kids is visiting 3 locations in FNQ to provide a series of 1-day education sessions for therapists wanting to learn about assistive technology (AT) for kids.

Education at ILS

Meeting Paediatric Assistive Technology Needs: the 24-Hour Solution

As therapists we spend a great deal of time prescribing children's wheelchairs and seating systems but often forget about the other hours of the day that our children are out of their wheelchairs.

Come join us in this paediatric focused seminar to enhance your knowledge about 24-hour positioning, including: night-time positioning, sitting, standing, car seat selection & regulations and leisure equipment assistive technology (AT).

- Hear from industry leading educators and assistive technology professionals.
- Get the latest research updates and evidence-based principles in the selection of paediatric AT solutions.
- Participate in lab sessions and learn how to setup and adjust the equipment so that you can build confidence in prescribing AT solutions for your clients.
